

The diagram shows a motor circuit. A green line representing the power supply enters from the left, passes through a red vertical line labeled 'L1, L2, L3', and then through a green box labeled 'SZR.0'. After the box, the line goes through a green circle labeled '1F1' (representing a fuse) and then to a motor symbol (a circle with 'M' inside). The motor is connected to a horizontal busbar. The busbar is labeled 'Mdbus' at its right end.

TN-S, 3x230/400V, 50 Hz
